

# New Chemistry Club Formed

---

Organized to give college chemistry students some of the more interesting aspects of chemistry which cannot be taken in the course of regular classroom work, the Chemistry Club of Canisius College held its first meeting at the college Wednesday evening, February 15.

Austin V. Signeur, assistant professor of Chemistry, is the moderator of the new organization. Club members hope to sponsor a publication for the chemistry department. Other plans include the fostering of library projects in the form of student exhibits, and visits to various chemical plants in the city.

Ernest L. Decker was named chairman of the five student directors of the newly formed Canisius College Chemistry Club who were elected last night at the club's first meeting.

Other directors include: Blake F. Mago, Robert W. Moyce, Edward J. Wandel, and Bruno J. Zwolinski. Austin V. Signeur, M.S., Assistant Professor of Chemistry, is the moderator of the organization. Club meetings will be held twice monthly at the college.
