

Dr. Crowdle In Charge

Taking charge of this means of cooperating with the government's National Defense Training Program is Doctor J. H. Crowdle, well-known member of the College's Chemistry Department. Doctor Crowdle is especially fitted for his new task because of his previous experience as an inspector of explosives during the last World War.

The purpose of the course is to familiarize students with the simple routine of chemical analysis of explosives. Although no official school credit will be gained, the graduates of the course will be prepared for positions as inspectors in plants manufacturing explosives, all of which must comply with specified government standards.
