33 credits

The MS in Community and School Health (CSH) program is designed for nurses, social workers, counselors, psychologists, and other health professionals with a bachelor’s degree and the appropriate health background.

Graduates of the Community and School Health program will have excellent knowledge surrounding health education, health services, social services, health promotion, and family and community involvement. Graduates will be well-prepared to participate in the development of policy within the work place, as well as healthcare systems at the community, state or national level.
