Safety, Health and Environmental Committee

The Safety, Health and Environmental Committee has the mission to advise the College on occupational health and safety in conformity with applicable laws, regulations, codes, and standards.

The principal functions of the Committee are:

• To maintain liaison with all Departmental Health and Safety committees.

• To provide a forum to discuss health and safety issues for faculty, staff, and students in order to prevent or remedy health and safety problems.

• To formulate recommendations for the health and safety program requirements of the College.

• To suggest internal safety standards for hazardous activities.

• To disseminate information on occupational health and safety topics to the College community.

• To participate in health and safety meetings, conferences, seminars, and training programs.

• To advise the College on OSHA requirements and other Government resources concerned with occupational health and safety.
